

## AGENDA

1. Feedback from WA to CC the interface cabinet and Power interface components. In particular regarding system devices.
2. Interlocks definition (that has impact on the Power interfaces and Interface cabinet design).
3. Plan for Reviews. WBS states to be done by SYS ENG. What is to be reviewed.
4. For the Short Project: discussion on the scope: current positions for instruments, CCF instruments not part of Infra.
5. Plan for Acceptance for Infra elements provided by the LST for the Short Project (Datacenter, substation) that are included in the Short Project.
6. SAS Interface with Civil and Building Works
7. Interface cabinet design details i.e dimensions, component weight, mounting requirements, cable duct no and sizes
8. Technical Building – Design Brief
9. Mechanical and Civil Interfaces
10. 3<sup>rd</sup> Party interface connections i.e Power and network.
11. Computer Hardware interfaces - spatial demands
12. HVAC Interfaces – structural and spatial demands
